

Frankstahl **International**

that's quality without borders.

FRANKSTAHL
that's quality

At Frankstahl, **innovation** is a tradition - and has been for more than 100 years.

As a competent wholesaler for every type of steel product, Frankstahl stands for reliability, dynamism and global-mindedness. Frankstahl grew up in the steel trade, and convinces

with its high quality and worldwide network of branch offices. In logistics, Frankstahl enjoys an international reputation. Wherever you need us, we're there. On the spot.

Numbers aren't everything. But they sometimes form the basis for a successful decision.

11 warehouse locations, 50,000 tons of permanent warehouse supplies, 450 employees, 75,000 square metres of storage space, more than two thirds of it roofed over; 30,000 products – from hollow sections, seamless and welded tubes, metal sheets, girders and

hot rolled bars, structural and cold drawn steel, all the way to tube bends, flanges and welding fittings in black and stainless steel – it all makes us the storage specialists with the broadest and most comprehensive assortment of steel products in Central Europe.

Our customers have tough **selection criteria**. We fulfil them. Immediately.

That's why we built up logistics that are unique in Central Europe. Delivery within 24 hours anywhere in Austria, from a huge product assortment; warehouse storage in the Czech Republic, Slovakia, Hungary, Slovenia and Croatia; and a guarantee of supply from

our complete product assortment within just a few days. All of which is why leading firms in the steel and mechanical engineering industries, plant engineering, domestic technology and pipeline construction number among our customers.

Our partners aren't just anyone - they're the best.

The purchasing volume with a permanent 50,000 tons of storage that the Frankstahl Group represents speaks for itself. And a firm that's prompt and reliable with its deliveries needs partners it can count on. We're not interested in quick and brief business relationships but in reliable long-term partnerships, and that

applies to customers just as much as to suppliers. Because it's the people behind Frankstahl who make the difference. 450 committed employees, thinking along with you every step of the way, are partners you know you can rely on.

Products / Locations
